CAREER SUMMARY

Software Development Engineer with over 5 years of experience in designing and building large-scale production systems for companies like **Angel One** and **Innovaccer** by writing high-performance production-quality code. Skilled in **Python, Java, C++** and **Go**, with expertise in Backend Development.

WORK EXPERIENCE

- Angel One** April 2025 – Present
Software Development Engineer 2
Angel One Feb 2022 – March 2025
Software Development Engineer I
Mumbai, India
- Designed and developed systems for the third largest stock broker in India as a core member of the **Charts Team**
 - Replaced PySpark consumers with Golang, boosting processing speed by **5x** and reducing latency for real-time data streams
 - Led the migration of hundreds of Airflow workflows to AWS Schedulers, optimizing infrastructure and reducing operational costs by **10K USD** per month
 - Developed robust REST APIs in Golang handling peak TPS of **500k** for efficient access to charts data
- Innovaccer** July 2020 – Feb 2022
Software Development Engineer I
Noida, India
- Core team member of the **Data Platform Team** for the world's best healthcare data platform
 - Orchestrated migration of legacy systems to the new data platform, ensuring **100% data integrity** and **uninterrupted services** for over **500** healthcare providers
 - Took ownership of Data Parsers and Python Pipelines for ETL processes, improving data workflows and system efficiency
 - Developed a **Query Conversion Tool** to convert queries between different DSLs, streamlining database operations
- Jan Elaaj Healthcare Pvt. Ltd.** May 2018 – July 2018
Android Developer Intern
New Delhi, India
- Created Doctor's and Patients Android App from scratch
- FOSSASIA** Sept 2017 – Feb 2018
Open Source Developer
Singapore
- Contributed to SUSI AI Android App, an open-source personal assistant utilizing artificial intelligence

EDUCATION

- Jamia Millia Islamia** New Delhi, India
Bachelor of Technology in Electronics and Communication Engineering
Aug 2016 – May 2020
- Cumulative Performance Index (CPI): 9.58/10

ACHIEVEMENTS

- Tech Titan Award at Angel One (Jun 2023 – Jul 2023)
Leading by Example Award at Innovaccer (Jan 2021 – Sep 2021)
Champion of the Quarter Award at Innovaccer (Oct 2020 – Dec 2020)
National Finalist of Smart India Hackathon (Mar 2018)
Secured 1st Position in Open Govt Data Hack (Oct 2017)
Secured 1st Position in DCB Bank FinTech Hackathon (Sep 2017)
Secured 1st Position in Code-Fuze (Competitive Programming) (Jamia Spring Fest '18)
Runners-up in Code Relay (Competitive Programming) (Jamia xTacy 19')

TECHNICAL SKILLS

- Languages:** C++, Python, GoLang, Scala, C, Java, Bash, Node.js
Databases: PostgreSQL, MongoDB, Snowflake, TimescaleDB, MySQL, Redis
Tools & Technologies: Amazon Web Services(AWS), Microsoft Azure, Google Cloud, Docker, Kubernetes, Kafka, ArgoCD, ElasticSearch, Git, Linux, Microservices, Django, Grafana, Prometheus, Graylog, Apache Spark, Algorithms, Test-Driven Development (TDD), A/B testing, SOA (service-oriented architecture)

PROJECTS

- [AI Equalizer](#) April 2025 – May 2025
- Built a native Android audio enhancement app featuring 5–31 band equalizers, bass booster, volume amplifier, real-time DSP (limiter, loudness enhancer), support for 10,000+ headphones, localized in 50+ languages, with 200K+ installs across 100+ countries and 4.7 rating from 4K+ reviews
- [Jamia Connect](#) Aug 2017 – Sept 2017
- Android App made for the students of Jamia, featuring notes sharing, discussion forum, marketplace, and maps.
